

One of the preferred methods of a room combining solution is when two individual rooms merge into one. Each room in a 82121 TEKVOX drop-in solution consists of a TEK 1201-I seamless switcher with iPad controller which connects to a TEK MHD44TP 4x4 HDBaseT matrix. When they become separated, the rooms route to their own projectors. When they are put back together, the initiating room routes to all the other rooms. The TEK MHD44TP can either be mounted in a small rack or a 2x2 ceiling rack such as the FSR CB-224.
