

With the need for plenum rated products and cables located in the ceiling, TEKVOX offers a unique plenum rated TEK CB1-A ceiling box. This box allows you to include non-plenum rated products and cables in the ceiling next to the video projector or display. One of the biggest issues when installing a video projector is how to handle the power cord and HDMI cables. These cords are not easy to find in plenum and can often be expensive. The TEK CB1-A solves this issue by placing the power outlet and HDMI connection on the bottom of the ceiling. With the need to place HDBaseT products and other products such as amplifiers in the ceiling, the CB1-A not only supplies a secure location for these items, but supplies power outlets as well.

To simplify installations, TEKVOX offers the Drop-In™ line of products. These products include the HDBaseT receiver and TEK 2 already installed in the ceiling box, which is fully configured and ready to be used. The installer only needs to install and secure the ceiling box, connect a few cables, and have an electrician wire in the power. Unlike other ceiling boxes, the TEK CB1-A is shipped fully wired. The electrician only needs to connect the power connections in a junction box mounted on the side of the TEK CB1-A.

Features:

- 2' x 1' ceiling box
- Plenum rated conforms to UL 2043 Fire and Safety test
- Six + One electrical outlets
- Removable equipment tray
- HDMI cable connection for HDBaseT receiver
- Ceiling connections for power, HDMI, and control
- Options include HDBaseT receiver, TEK 2, and fan
- Cover can be customized for large orders
- All mounting hardware included

Device Specifications

Model	TEK CB1-A (78038)
Inside Power Outlets	6 Commercial power outlets
Outside Power Outlet	1
Outside HDMI Connection	1
Outside Control Connection	TekSecurity 6 pin RJ12
Agency Approvals	ETL 4008930
Conforms To:	UL 2043 Fire and Safety test UL 60950-1 Information Technology
Main Line Power	120V 60 Hz maximum 15 Amps
Size	W: 23.75" / L: 14.00" / D: 5.00"
Box Weight	13.00 lbs.
Shipping Weight	17.00 lbs. Including HDBaseT Receiver and TEK 2
