Safety Precautions

To ensure the best performance from the product, please read all instructions carefully before using the device. Save this manual for further reference.

- Unpack the equipment carefully, and save the original box and packing material for possible future shipment
- Follow basic safety precautions to reduce the risk of fire, electrical shock and injury to persons
- Do not dismantle the housing or modify the module (electrical shock or burn hazard)
- Using supplies or parts not meeting the products' specifications may cause damage, deterioration or malfunction
- Refer all servicing to qualified service personnel
- To prevent fire or shock hazard, do not expose the unit to rain, moisture or install this product near water
- Do not put any heavy items on the product's power cable
- Do not remove the housing of the device as opening or removing housing may expose you to dangerous voltage or other hazards
- Install the device in a place with sufficient ventilation to avoid damage caused by overheating
- Keep the module away from liquids
- Spillage into the housing may result in fire, electrical shock, or equipment damage. If an object or liquid falls or spills on to the housing, unplug the module immediately.
- Do not twist or pull by force ends of the cable. It can cause malfunction.
- Do not use liquid or aerosol cleaners to clean this unit. Always unplug the power to the device before cleaning.
- Unplug the power cord when left unused for a long period of time
- Information on disposal for scrapped devices: do not burn or mix with general household waste, please treat them as normal electrical wastes

79086-S User Manual

1. Product Introduction

The HDMI 1.4 Extender consists of a transmitter and a receiver. It can extend 4K or 1080p video to distance up to 328 feet (100 meters) over a single CAT6a cable. It supports bi-directional RS-232 pass-through control and Ethernet extension. 36V PoC feature allows the transmitter can be powered by the receiver and only one power adapter is needed in system.

2. Features

- Supports HDMI 1.4 and the HDMI video resolution up to 4K@60Hz 4:2:0
- Supports HDCP bypass and HDCP 2.2 compliant
- Extends 4K or 1080p video signals to distances up to 328 feet (100 meters) over a single CAT6a cable
- Bi-directional RS-232 pass-through control and Ethernet extension
- Provides up to 30W power for 3rd party device (e.g. HD Camera) on transmitter
- Supports 36V PoC, which allows the transmitter to be powered by the receiver

3. Package List

- 1x Transmitter
- 2x TX Mounting Ears with 2x screws
- 4x TX plastic cushions
- 1x RS-232 Cable (3-pin to 8-pin Mini-DIN)
- 2x 3-pin terminal blocks
- 1x Power Adapter (DC 24V, 2.71A)
- 1x Power Cord (2-pin to 5.5x3.0mm jack)
- 1x Receiver
- 2x RX Mounting Ears with 2x screws
- 4x RX plastic cushions
- 1x RS-232 Cable (3-pin to DB-9)
- 1x 2-pin terminal block
- 1x Power Cord
- 1x User Manual

Note: Please contact your distributor immediately if any damage or defect in the components is found.

79086-S User Manual

4. Panel Description

4.1 Transmitter

1. **HDMI IN:** Connects to HDMI source device
2. **CAM 12V:** Provides 12V, 2.5A power for source device (e.g. camera)
3. **Ethernet:** Used for Ethernet extension together with the Ethernet port of the receiver. If one Ethernet port is connected to a router, the other is able to access the LAN network
4. **RS-232:** Connects to the source device (e.g. camera) to be controlled by a far-end control device, or connects a control device (e.g. PC) control a far-end display device (e.g. projector)
5. **Power LED:** Illuminates green when power is applied
6. **HDBaseT Out:** The RJ45 port is connected to the HDBaseT Input port of the receiver by a CAT6a cable. The LINK LED illuminates when there is a valid HDBaseT link between the transmitter and receiver. The HDCP LED illuminates when the video contains HDCP content, or blinks when the video is transmitted without HDCP content.

79086-S User Manual

4.2 Receiver

1. **HDMI Out:** Connects to HDMI display device (e.g. projector)
2. **Ethernet:** Used for Ethernet extension together with the Ethernet port of the transmitter. If one Ethernet port is connected to a router, the other is able to access the LAN network
3. **RS-232:** Connects the display device (e.g. projector) to be controlled by a far-end control device, or connects a control device (e.g. PC) to control a far-end source device (e.g. camera)
4. **Power LED:** Illuminates green when power is applied
5. **HDBaseT In:** The RJ45 port is connected to the HDBaseT output port of the transmitter by a CAT6a Ethernet cable. The LINK LED illuminates when there is a valid HDBaseT link between the transmitter and receiver. The HDCP LED illuminates when the video contains HDCP content, or blinks when the video is transmitted without HDCP content.
6. **DC 24V:** DC Connector for the power adapter connection
